

A

Factors:

- Access to treatment (%)
- Degree of resistance to the short-acting drug
- Degree of resistance to the long-acting drug
- Fitness cost
- Half-life of the short-acting drug (days)
- Cmax/EC50 of the short-acting drug
- Cmax/EC50 of the long-acting drug
- EIR (inoculations per person per year)
- E_{max} of the short-acting drug (per day)
- E_{max} of the long-acting drug (per day)
- Diagnostic detection limit (parasites/microliter)

B

Factors:

- Access to treatment (%)
- Degree of resistance to the short-acting drug
- Degree of resistance to the long-acting drug
